#### Capitalization Rates

As at March 31, 2022, and December 31, 2021, the Company had its portfolio internally appraised. In addition, the Company's U.S. portfolio is appraised by independent U.S. real estate appraisal firms on a three-year cycle.

The Company determined the fair value of each income producing property based upon, among other things, rental income from current leases and assumptions about rental income from future leases reflecting market conditions at the applicable consolidated balance sheet dates, less future cash outflow pertaining to the respective leases. The Company's multi-suite residential properties are appraised using the direct capitalization of income method. The retail, office and industrial properties are appraised using a number of approaches that typically include a discounted cash flow analysis, a direct capitalization of income method and a direct comparison approach. The discounted cash flow analysis is primarily based on discounting the expected future cash flows, generally over a term of 10 years, including a terminal value based on the application of a capitalization rate to estimated year-11 cash flows.

As at March 31, 2022, using the direct capitalization approach, the multi-suite residential, retail, office and industrial properties were valued using capitalization rates in the range of 3.0% to 9.8% (December 31, 2021 - 3.0% to 9.8%), resulting in an overall weighted average capitalization rate of 5.2% (December 31, 2021 - 5.2%).

The stabilized capitalization rates by asset type are set out in the following table:

Fair values are most sensitive to changes in discount rates, capitalization rates and stabilized or forecast net operating income. Generally, an increase in stabilized net operating income will result in an increase in the fair value of the income producing properties, and an increase in capitalization rates will result in a decrease in the fair value of the properties. The capitalization rate magnifies the effect of a change in stabilized net operating income, with a lower capitalization rate resulting in a greater impact on the fair value of the property than a higher capitalization rate. If the weighted average stabilized capitalization rates were to increase or decrease by 25 basis points (assuming no change in stabilized net operating income), the value of the income producing properties as at March 31, 2022, would decrease by \$489,448 and increase by \$544,488, respectively.

The sensitivity of the fair values of the Company's income producing properties as at March 31, 2022, and December 31, 2021, is set out in the table below:

| As at                                 | March 31, 2022     |                  | December 31, 2021 |           |

### Impairment Provision

The Company identified each hotel property as a cash-generating unit for impairment purposes. The recoverable amounts of the hotel properties have been estimated using the value-in-use method or fair value less costs to sell. Under these calculations, discount rates are applied to the forecasted cash flows reflecting the assumptions for hotel activity. The key assumptions are the first year net operating income and the discount rate applied over the useful life of the hotel property. IFRS permits an impairment provision to be reversed in the subsequent accounting periods if recoverability analysis at that time supports reversal.

During the year ended December 31, 2021, impairment indicators were identified and a recoverability analysis was completed in accordance with the procedures specified by IFRS, which indicated that an impairment provision of \$45,289 should be recorded at 12 hotels. The table below provide details of first-year net operating income and the discount rates used for valuing the hotel properties.

**Government subsidy**

On April 11, 2020, the Canada Emergency Wage Subsidy ("CEWS") was enacted, which provides a subsidy for each employee employed between March 15 to June 6, 2020. Subsequently, the Government of Canada extended CEWS to October 23, 2021 and on October 24, 2021, the CEWS was replaced with two new programs offering wage and rent support: i) the Tourism and Hospitality Recovery Program ("THRP") and ii) the Hardest-Hit Business Recovery Program. The subsidy varies depending on the decline in revenue for each claim period. A company, or a group of companies under common control, will become eligible for the program if they've experienced a reduction in revenue during the qualification period.

The Company and associated related party group under common control with the Company, including Morguard's parent company, Paros Enterprises Limited, have satisfied certain eligibility criteria, including (among others) a significant decline in revenue due to the temporary closures of non-essential services. The Company will continue to assess its eligibility for subsequent claim periods.

For the three months ended March 31, 2022, the Company recorded government subsidies amounting to \$1,604 (2021 - \$7,595) as a deduction of the related expense, of which \$nil (2021 - \$1,100), \$1,604 (2021 - \$4,523) and \$nil (2021 - \$1,972) are a deduction of property operating costs, hotel operating expenses and property management and corporate expenses, respectively.

As at March 31, 2022, mortgages payable includes two mortgages (including unamortized deferred finance costs) classified as current amounting to \$36,369.

The Company's first mortgages are registered against specific real estate assets and hotel properties. As at March 31, 2022, mortgages payable mature between 2022 and 2058 and have a weighted average term to maturity of 4.4 years (December 31, 2021 - 4.6 years) and approximately 94% of the Company's mortgages have fixed interest rates.

Some of the Company's mortgages payable require it to maintain annual debt service coverage ratios and/or debt to equity ratios and/or debt to appraised value ratios and arrange for capital expenditures in accordance with predetermined limits. As at March 31, 2022, the Company was not in compliance with one (December 31, 2021 - two) debt ratio covenant affecting one (December 31, 2021 - two) mortgage loan secured by a hotel property amounting to \$10,125 (December 31, 2021 - \$39,795). The Company's Unsecured Debentures contain covenants that are calculated on a non-consolidated basis, which represents the Company's consolidated results prepared in accordance with IFRS as shown on the Company's most recently published annual audited consolidated financial statements, adjusted, as required, to account for the Company's public entity investments in Morguard Residential REIT and Morguard REIT using the equity method. The covenants that the Company must maintain are a non-consolidated interest coverage ratio above 1.65 times, a non-consolidated debt to gross book value ratio not to exceed 65% and a minimum non-consolidated equity requirement of at least \$300,000. If the Company does not meet these covenants, the Unsecured Debentures will become immediately due and payable unless the Company is able to remedy the default or obtain a waiver from debentureholders. The Company is in compliance with all Unsecured Debenture covenants.

## NOTE 26

### FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Refer to the Company's annual audited consolidated financial statements as at and for the year ended December 31, 2021, for an explanation of the Company's risk management policy as it relates to financial instruments.

#### Fair Value of Financial Assets and Financial Liabilities

The fair values of cash, restricted cash, amounts receivable, accounts payable and accrued liabilities and bank indebtedness approximate their carrying values due to the short-term maturity of those instruments. The fair values of mortgages and loans receivable are based on the current market conditions for financing loans with similar terms and risks. The loans payable are reflected at fair value since they are based on a floating interest rate and reflect the terms of current market conditions.

Mortgages payable, Unsecured Debentures, convertible debentures, lease liabilities and finance lease receivable are carried at amortized cost using the effective interest rate method of amortization. The estimated fair values of long-term borrowings have been determined based on market information, where available, or by discounting future payments of interest and principal at estimated interest rates expected to be available to the Company.

The fair value of the mortgages payable has been determined by discounting the cash flows of these financial obligations using March 31, 2022, market rates for debts of similar terms (Level 2). Based on these assumptions, the fair value as at March 31, 2022, of the mortgages payable before deferred financing costs and mark-to-market adjustments is estimated at \$4,515,079 (December 31, 2021 - \$4,769,113), compared with the carrying value of \$4,607,875 (December 31, 2021 - \$4,648,175). The fair value of the mortgages payable varies from the carrying value due to fluctuations in interest rates since their issue.

The fair value of the Unsecured Debentures liability is based on its closing bid price (Level 1). As at March 31, 2022, the fair value of the Unsecured Debentures has been estimated at \$813,426 (December 31, 2021 - \$833,002) compared with the carrying value of \$825,000 (December 31, 2021 - \$825,000).

The fair value of the convertible debentures liability is based on their market trading prices (Level 1). As at March 31, 2022, the fair value of the convertible debentures before deferred financing costs has been estimated at \$179,959 (December 31, 2021 - \$180,769), compared with the carrying value of \$179,500 (December 31, 2021 - \$179,500).

The fair value of the finance lease receivable is determined by discounting the cash flows of the finance lease receivable using March 31, 2022, market rates for debt on similar terms (Level 3). Based on these assumptions, as at March 31, 2022, the fair value of the finance lease receivable has been estimated at \$57,911 (December 31, 2021 - \$57,772).

The fair value hierarchy of financial instruments and real estate properties measured at fair value in the consolidated balance sheets is as follows:

| As at   | March 31, 2022 |         |              | December 31, 2021 |         |              |
